

EXAMPLE; what are your measurements?

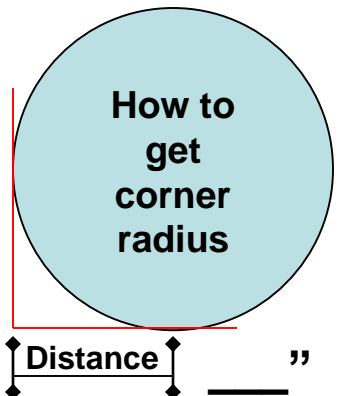

Bow

Anything & Everything attached to hoop, (**inside AND outside**) **must** be included;

Rocket Launchers Outside grab bars Additional tubing Spreader lights Antenna plates etc....

Yes, Rocket Launchers and other things are on the outside, but need to be included. **Failure to include these items will delay Job.**

Corner Radius:
Trace **inside** of corner on cardboard, then, take cardboard to a table and using a straight edge, extend those lines until they connect. Then measure from connection point, (**staying on the line**) until it touches the radius as indicated above.
